EXPLANATORY NOTE TO THE FINANCIAL STATEMENTS
For the accounting period from 01/01/2026 to 31/03/2026

I. CHARACTERISTICS OF BUSINESS ACTIVITY

1. Form of capital ownership

Construction Joint Stock Company No. 1 (hereinafter referred to as the "Company") is a joint-stock company established under the Decision No. 1173/QĐ-BXD dated August 29, 2003 of the Minister of Construction on the transfer of Construction Company No. 1 - a State-owned enterprise under the Vietnam Import-Export and Construction Corporation (now the Import-Export Joint Stock Corporation and Vietnam Construction) into Construction Joint Stock Company No. 1. The Company operates under the Business Registration Certificate No. 0103002982 first registered on January 6, 2003, amended for the 13th time on June 13, 2018 issued by the Department of Planning and Investment of Hanoi City. The Company officially listed its shares on the Hanoi Stock Exchange on May 14, 2009 with the stock code VC1.

The charter capital of the Company according to the 14th amended Business Registration Certificate dated May 8, 2024 is VND 120,000,000,000.

The total number of employees of the Company as at March 31, 2025 is 130 (December 31, 2025 is 128). The Company's head office is located at D9, Khuat Duy Tien Street, Thanh Xuan Ward, Hanoi City, Vietnam.

2. Business Area

The Company is mainly engaged in the construction of industrial and civil works

3. Business Scope

The Company's business activities includes:

Construction of civil and industrial buildings;

Construction of infrastructure works: Transport, irrigation, water supply and drainage and environmental treatment;

New urban area development business, industrial park infrastructure and real estate business;

Production and trading of building materials;

Investment consultancy for the implementation of construction investment projects, project formulation, bidding consultancy, project supervision and management consultancy;

Travel hotel business;

Agents for domestic and foreign companies trading in items for production and consumption;

Design of total floor plan, interior and exterior architecture for civil and industrial construction works;

Design of water supply and drainage systems in urban and rural areas, treatment of wastewater and domestic water;

Structural design for civil, industrial and technical construction works of urban infrastructure and industrial parks;

Construction of bridges and roads;

Surveying and surveying the topography, geology and hydrology in service of the design of works and formulation of investment projects;

Urban housing and office management services;

Production, processing and installation of mechanical products;

Warehouse leasing services; transportation, loading and unloading of goods;

Demolition of civil and industrial works;

Leasing construction equipment and machinery; formwork scaffolding;

Financial business.

4. Ordinary production and business cycle

The Company's ordinary production and business activities are 12 months.

Average production and business cycle of sectors and fields are 12 months.

5. Characteristics of the enterprise's operation in the accounting period affecting the Financial Statements

During the accounting period, the Company's operation no longer have any significant characteristics that affect the Financial Statements. The Company's operation took place usually in all periods of the year.

II. ACCOUNTING PERIODS, MONETARY UNITS USED IN ACCOUNTING

1. Annual Accounting Period

The Company's annual accounting period starts from January 1 and ends on December 31 of every calendar year.

2. Currency used in accounting

The currency used in accounting is the Vietnamese dong (the national symbol is "đ"; the international symbol is "VND").

III. APPLICABLE ACCOUNTING STANDARD AND REGIME

1. Applicable accounting regime

The Company applies the Corporate Accounting Regime issued under Circular No. 99/2025/TT-BTC dated 27/10/2025 of the Ministry of Finance guiding the Corporate Accounting Regime.

2. Statement of compliance with Accounting Standards and Regimes

The Company has applied the Vietnam Accounting Standards and guiding documents issued by the State. Financial statements shall be prepared and presented in accordance with all provisions of each standard, circular guiding the implementation of standards and the current applicable accounting regime.

IV. APPLICABLE ACCOUNTING POLICY

1. Principle of recording cash and cash equivalents

Cash and cash equivalents include cash at the fund, bank deposits, short-term investments with a maturity period of not more than 03 months, high liquidity, easy conversion into defined amounts of cash and not much risk in converting into cash.

Amounts deposited and deposited by other enterprises and individuals at the Company shall be managed and accounted as the Company's cash.

2. Principle for recording receivables

The classification of receivables as customer receivables and other receivables shall be carried out according to the following principles

- a. Receivables of customers include receivables of a commercial nature arising from transactions of a buy-sale nature, such as Receivables for sale, provision of services, liquidation, sale of assets (fixed assets, financial investments) between the Company and the buyer (which is an independent unit from the seller, including receivables between parent companies and subsidiaries, joint ventures and associates). This receivable includes receivables from the sale of export goods of the entrusting party through the entrusted party.
- b. Other receivables include receivables that are not commercial and not related to purchase and sale transactions, such as
 - Receivables that generate revenue from financial activities, such as receivables from loan interest, deposits, dividends and profits distributed
 - Third-party payments that are entitled to be reimbursed Amounts payable by the export trustee for the entrusting party
 - Non-commercial receivables such as lending assets, receivables in terms of fines, compensation, pending assets, etc.

When preparing Financial statements, accountants base on the remaining term of receivables to classify them as long-term or short-term. The receivables indicators of the Balance sheet may include amounts reflected in accounts other than accounts receivable, such as Loans reflected in A/C 1283, deposits and bets reflected in A/C 244, advances in A/C 141..

3. Principle for recording inventory

a. Principles for recording inventory

The Company's inventory is assets purchased for production or for sale in the ordinary production and business period. For unfinished products, if the production and turnover time exceeds a normal business cycle, they are not presented as inventories on the balance sheet but as long-term assets.

All kinds of products, goods, supplies, and assets that are kept on their behalf, consigned, entrusted for import and export, processed, etc. not under the ownership and control of the Company, it is not reflected as inventory

Inventory is calculated at the cost price. In case the net realizable value is lower than the original price, the inventory is calculated according to the net realizable value. The cost of inventory includes the cost of purchase, processing costs, and other directly related costs incurred to obtain inventory in its current location and state.

The unfinished production and business expenses at the end of the period are of the construction and installation works implemented by the Company and of real estate business projects in which the Company is the investor, including direct raw material costs, direct labor costs, etc costs for using construction machines, costs for site clearance, and general production costs are collected for each work and project corresponding to the volume of implementation that has not yet been accepted or the area of real estate that has not yet been sold to customers.

b. Inventory Value Calculation Method

The value of inventory is determined according to the weighted average method.

c. Inventory accounting method

Inventory shall be accounted according to the method of regular declaration.

d. Inventory price reduction provisioning method

The provision for inventory price reduction established at the end of the year is the difference between the original price of inventory and the net realizable value.

4. Principle of recording and depreciation of fixed assets

Tangible fixed assets and intangible fixed assets are recorded at the original price. In the course of use, tangible fixed assets and intangible fixed assets are recorded at historical cost, accumulated depreciation and residual value.

Fixed assets leased finance shall be recorded at historical cost at the fair value or present value of the minimum rent payment (excluding VAT) and direct expenses initially incurred related to the financial leased fixed assets. In the course of use, financial leased fixed assets are recorded at historical cost, accumulated depreciation and residual value.

The depreciation of the Company's fixed assets is estimated appropriately and implemented according to the straight-line method as prescribed in the Circular No. 45/2013/TT-BTC dated 25/04/2013 of the Ministry of Finance promulgating the regime of management, use and depreciation of fixed assets, specifically as follows

Houses and Architectural Objects:	3 – 50 years
Means of transport:	4 – 6 years
Machinery and equipment:	4 – 10 years
Management equipment and instruments:	3 – 6 years

5. Principle of recording upfront cost

Prepaid expenses only related to the production and business expenses of a fiscal year or a business cycle are recorded as short-term prepaid expenses and are included in the production and business expenses in the fiscal year. Expenses incurred in the fiscal year but related to the results of production and business activities of many accounting years shall be accounted into long-term prepaid expenses for gradual allocation to the results of business activities in the following accounting years.

The calculation and allocation of long-term prepaid expenses to production and business expenses in each accounting period shall be based on the nature and extent of each type of expense in order to select reasonable allocation methods and criteria. Prepaid costs are gradually allocated to production and business expenses according to the straight-line method.

6. Principle of recording liabilities

The classification of payables as payables to sellers and other payables shall be carried out according to the following principles

a. Payables to sellers include payables of a commercial nature arising from the purchase of goods, services, assets and sellers (being independent units from buyers, including payables between parent companies and subsidiaries, joint ventures and associates). This payable includes amounts payable when importing through a trustee (in a consignment import transaction)

b. Other payables include non-commercial payables not related to the purchase, sale and supply of goods and services

Payables related to financial expenses, such as payables on loan interest, dividends and payable profits, payable financial investment activities

- Payables covered by third parties. Amounts of money received by the trustee from related parties for payment as specified in the import-export entrustment transaction
- Non-commercial payables such as payable due to borrowing property, payable fines, compensation, surplus pending assets, payable social insurance, health insurance, unemployment insurance, unemployment insurance, etc.

When making financial statements, the accountant shall base on the remaining term of the payables to classify them as long-term or short-term. When there is evidence that a loss is likely to occur, the accountant immediately records an amount payable on the principle of prudence.

Accounts payable of foreign currency origin shall be re-evaluated at the end of the period when making financial statements. The actual transaction rate when re-evaluating repayables of foreign currency origin at the time of making financial statements is the exchange rate announced by the commercial bank where the enterprise regularly conducts transactions (chosen by the Company itself when dealing with payables).

7. Principles for recording loans

Loans with a repayment period of more than 12 months from the time of making financial statements, the accountant presents them as long-term loans and financial lease debts. Amounts due within the next 12 months from the time of making financial statements, the accountant presents as short-term loans and financial leases to have a payment plan.

Borrowing costs are directly related to the loan (in addition to interest payable), such as appraisal, audit, loan dossier preparation, etc. shall be accounted into financial expenses. In case these expenses arise from a separate loan for the purpose of investment, construction or production of unfinished assets, they shall be capitalized.

When making financial statements, the balance of loans in foreign currencies shall be re-evaluated according to the actual exchange rate at the time of making the financial statements. Exchange rate differences arising from the payment and revaluation of loans in foreign currencies at the end of the period shall be accounted into revenues or expenses for financial activities.

8. Principles of recording and capitalizing borrowing expenses

Borrowing expenses shall be recorded in production and business expenses in the period when they are incurred, except for borrowing expenses directly related to the construction investment or production of unfinished assets, which are included in the value of such assets (capitalized) when they fully meet the conditions specified in Vietnam Accounting Standard No. 16 "Borrowing expenses".

Borrowing expenses directly related to the investment in construction or production of unfinished assets that need to be long enough (over 12 months) to be put into use for predetermined purposes or sold shall be included in the value of such assets (capitalized). Including loan interests, allocation of discounts or surcharges when issuing bonds, and additional costs incurred related to the loan procedure.

For private loans for the construction of fixed assets and investment real estate, the loan interest is capitalized even if the construction period is less than 12 months.

9. Principles for recording expenses payable

Amounts payable for goods and services received from the seller or provided to the buyer in the reporting period but not yet paid due to lack of invoices or insufficient accounting documents and documents, shall be recorded in the production and business expenses of the reporting period.

The accounting of payable expenses into production and business expenses in the period must comply with the principle of consistency between turnover and expenses incurred in the period.

Expenses to be paid must be finalized with the actual expenses incurred. The difference between the previous deduction and the actual cost will be refunded

10. Principles for recording equity

a. Principles for recording the owner's contributed capital

The owner's investment capital is recorded according to the owner's actual contributed capital.

b. Principles for recording undistributed profits

Undistributed profit after tax is the amount of profit from the Company's activities after deducting (-) adjustments due to retroactive application of changes in accounting policies and retroactive adjustments to material errors of previous years. Undistributed after-tax profits may be distributed to investors based on the capital contribution ratio after being approved by the Board of Directors and after setting aside reserve funds in accordance with the Company's Charter and the provisions of Vietnamese law.

11. Principles and methods of recording revenue.

a. Revenue from Real estate business

Revenue from real estate business is recorded when the following conditions are satisfied at the same time.

- The real estate has been fully completed and handed over to the buyer, the enterprise has transferred the risk and benefits associated with real estate ownership to the buyer.
- The Company no longer holds the right to manage the property as the owner of the property or control of the property.
- Revenue is determined with relative certainty.
- The Company has obtained or will derive economic benefits from the sale of real estate.
- Determine the costs associated with the sale.

Revenue from the Company's construction contracts is recorded according to the Company's accounting policies on construction contracts.

b. Construction Contract

When the results of the construction contract performance can be reliably estimated, the revenue and costs related to the contract are recorded in proportion to the part of the work completed at the end of the accounting year, which is calculated as a percentage of the costs incurred of the completed part of the work at the end of the accounting year compared to the total estimated cost of the contract, except for the case where this cost is not equivalent to the completed construction and installation volume. This expense may include ancillary costs, compensation and performance bonuses as agreed with the client.

When the result of the construction contract performance cannot be reliably estimated, the enterprise is only recorded as equivalent to the cost of the contract incurred, and the reimbursement is relatively certain.

c. Revenue from financial activities.

Revenue arising from interest, dividends, divided profits and other revenues from financial activities shall be recognized when the following two (2) conditions are satisfied at the same time:

- Revenue arising from interest, dividends, divided profits and other revenues from financial activities shall be recognized when the following two (2) conditions are satisfied at the same time.
- Revenue is determined relatively certainly.

Dividends and profits are recorded when the Company is entitled to receive dividends or is entitled to receive profits from capital contribution

d. Other income

Reflecting incomes other than production and business activities of enterprises, including:

- Income from the sale and liquidation of fixed assets;
- Income from the sale and sublease of assets;
- Taxes payable when selling goods or providing services but then reduced or refunded (export tax refunded, VAT, SCT and environmental protection tax payable but then reduced);
- Collect compensation from third parties to compensate for lost assets (e.g., collection of indemnified insurance money, compensation for relocation of business establishments, and amounts of similar nature);
- Collect fines due to the customer's breach of contract;
- Other incomes other than those mentioned above.

12. Accounting principle for revenue deductions

Amounts that are adjusted and deducted from sales and service provision revenue incurred in the period, including: Trade discounts, discounts on goods sold and returned goods.

In case products, goods and services have been consumed from the previous periods to the next period before commercial discounts or discounts on sale or goods sold are returned, the Company shall record a decrease in turnover on the following principles:

- If products, goods or services that have been consumed from the previous periods, to the next period, must be discounted, must be traded, returned but arise before the time of issuance of the financial statements, the accountant shall consider this as an event that needs to be adjusted arising after the date of making the balance sheet and recording a decrease in revenue. on the financial statements of the reporting period (previous period).
- In case products, goods or services have to be reduced in price, subject to commercial discounts, or returned after the time of issuance of financial statements, the enterprise shall record a decrease in revenue of the arising period (the following period).

13. Accounting principle for cost of goods sold

Reflecting the cost value of products, goods and services sold in the period.

The provision for inventory depreciation is included in the cost of goods sold on the basis of the amount of inventory and the difference between the net realizable value is less than the original price of the inventory.

For the value of lost or lost inventory, the accountant shall immediately calculate it in the cost of goods sold (after deducting compensations, if any).

For the cost of raw materials directly consumed in excess of the normal level, labor costs, fixed general production costs not allocated to the value of warehousing products, accounting shall be immediately included in the cost of goods sold (after deducting compensations, if any) even if the products, goods that have not been determined to be consumed

Import taxes, excise taxes and environmental protection taxes have been included in the value of purchased goods, if such taxes are refunded when selling goods, they shall be recorded as reduced in the cost of goods sold.

Costs of goods sold are not considered as CIT calculation expenses according to the provisions of the Tax Law but have full invoices and vouchers and have been accounted in accordance with the accounting regime The Company does not record a decrease in accounting expenses but only adjusts in the CIT finalization to increase the payable CIT amount.

14. Principle of accounting for financial expenses

Reflecting expenses of financial activities, including expenses or losses related to financial investment activities, expenses for lending and borrowing capital, expenses for capital contribution to joint ventures, associations, short-term securities transfer losses, expenses for securities sale transactions; Provision for depreciation of trading securities, provision for investment losses in other units, losses incurred when selling foreign currency, exchange rate losses, etc.

Financial expenses that are not considered CIT calculation expenses under the provisions of the Tax Law but have full invoices and vouchers and have been accounted in accordance with the accounting regime The Company does not record a decrease in accounting expenses but only adjusts in the CIT finalization to increase the payable CIT amount.

15. Principle of accounting for selling expenses and business management expenses

Expenses recorded as selling expenses include: Actual expenses incurred in the process of selling products, goods or providing services, including costs of pitching, product introduction, product advertising, sales commissions, product warranty costs, goods, expenses for preservation, packaging and transportation...

Expenses recorded as enterprise management expenses include: Expenses on salaries of employees of the enterprise management department (salaries, wages, allowances,...); social insurance, health insurance, trade union funding, unemployment insurance of enterprise managers; expenses for office materials, labor tools, depreciation of fixed assets used for enterprise management; land rent, license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion...); other monetary expenses (reception, customer conferences, etc.)

Expenses for sale and management of enterprises are not considered as CIT calculation expenses according to the provisions of the Tax Law but have full invoices and vouchers and have been accounted in accordance with the accounting regime The Company does not record a decrease in accounting expenses but only adjusts them in the CIT finalization to increase the payable CIT amount.

16. Principles and methods of recording corporate income tax expenses

The current enterprise income tax expense is the payable enterprise income tax amount calculated on the taxable income in the year and the current enterprise income tax rate. Currently, the Company is applying the CIT rate of 20%.

Deferred income tax is calculated on the differences between the book value and the basis for calculating income tax on asset or debt items in the financial statements and is recorded according to the balance sheet method. Deferred income tax payable must be recognized for all temporary differences, while deferred income tax assets are recognized only when there is certainty of sufficient future taxable profits to deduct temporary differences.

Deferred income tax is determined by the estimated tax rate that will apply to the period in which the property is recovered or the liabilities are paid. Deferred income tax is recorded in the statement of business results and is recorded in equity only when such tax is related to items recorded directly in equity.

Deferred income tax assets and deferred tax liabilities payable are cleared when the Company has a legal right to clear between the prevailing income tax assets and the prevailing income tax payable and when the deferred income tax assets and deferred income tax liabilities payable in relation to corporate income tax are administered by the same tax authority and the Company intends to pay the current income tax on a net basis

17. Other accounting principles and methods

a. Financial instruments

Initial Recording

Financial assets

The Company's financial assets include cash and cash equivalents, customer receivables and other receivables, loans, short-term and long-term investments. At the time of initial recognition, financial assets are determined according to the purchase price/issuance cost plus other expenses directly related to the purchase and issuance of such financial assets.

Financial liabilities

The Company's financial liabilities include loans, seller payables and other payables, expenses payable. At the time of initial recognition, financial liabilities are determined according to the issuance price plus expenses directly related to the issuance of such financial liabilities.

The following values were initially recorded

Currently, there are no regulations on the re-evaluation of financial instruments after initial recognition.

b. Stakeholders

Businesses, individuals, directly or indirectly through one or more intermediaries, who control or are under the control of the Company, or share control with the Company, including the parent company, subsidiaries and affiliates who are related parties. Affiliates, individuals who directly or indirectly hold voting rights of the Company that have a significant influence on the Company, key management personnel including the Board of Directors, officers of the Company, close family members of these individuals or these affiliates or companies affiliated with individuals is also considered a stakeholder.

In considering each relationship of the parties involved, it is necessary to pay attention to the nature of the relationship, not just the legal form of those relationships
